Create Icons.
iOS and Android

All icons formats will be saved with required name and dimensions. Just place your design and save.
* Mobile.Design[+]Creator uses features such us smart symbols, smart objects, saving or exporting automatically to required size and name.
To use these features, it is necessary to use the Adobe Illustrator or Photoshop software.

Adobe Illustrator .ai template. Edited in Adobe Illustrator CS6 works with various versions of Adobe Illustrator.
The editable .ai template will automatically save the icons with required name and dimensions.
1.   Icon Design / Edit Smart Symbol – that will propagate to all other dimensions.
        Double click to edit symbol / Edit – Icon Design and Background Color. Replace the Symbol with your design.
2.   Save Settings for .ai Adobe Illustrator:
        File > Export
        Format > .png
        CheckBox > Use Artboards
        All icons formats will be saved automatically with required name and dimensions.

Adobe Photoshop .psd template. Edited in Adobe Photoshop CS6 works with various versions of Adobe Photoshop.
The editable .psd template will automatically save the icons with required name and dimensions.
1.   Icon Design / Edit Smart Object – that will propagate to all other dimensions.
        Double click EDIT DESIGN layer thumbnail to Edit Smart Object EDIT DESIGN. Replace the Smart Object with your design.
2.   Save Settings for .ai Adobe Photoshop:
        File > Save for Web
        Format > Images Only
        Settings > Default Settings
        Slices > All User Slices
   All icons formats will be saved automatically with required name and dimensions.
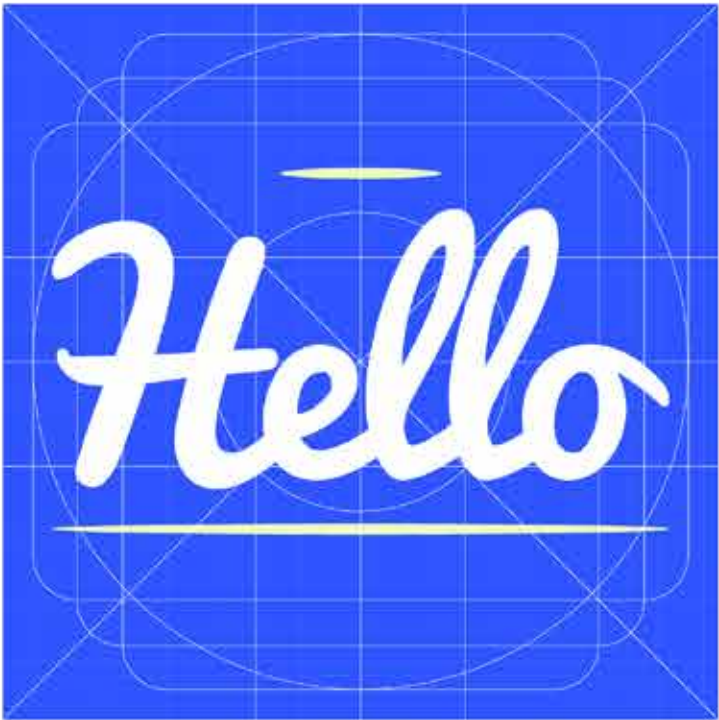

That's it.
